

How to apply your temporary tattoos

Step 1. Pick which tattoo you'd like to use and cut it out.

Step 2. Peel off the glossy adhesive film that is on top of the image.

Step 3. Place the Tattoo onto your skin. Make sure to apply ample amount of pressure to ensure placement of the image.

Step 4. Next, wet a towel and dab the tattoo well for about 10 seconds. Make sure that the entire surface of the paper is covered with water in order for the image to transfer properly.

Step 5. Once the paper has been properly moistened, remove the backing paper slowly.

Step 6. That's it! Reveal your beautiful and vibrant tattoo. Enjoy.
